

Profit Pulse Ally CRM

Standard User Manual

Version: 1.3 · **Audience:** Standard users (Relationship, Follow-up, and deal participants including doctors)

1. Introduction

Profit Pulse Ally CRM helps you manage assigned clients through the sales pipeline—from new lead to active client. Your access depends on your **account role** (Standard User) and how you are involved with each client:

- **Client-level team** — Relationship Officer or Follow-up Officer (Account Service)
- **Deal-level participation** — Doctor, Relationship, Follow-up, or other commission roles on specific deals

This manual covers everything a standard user needs for day-to-day work.

2. Getting started

Sign in

1. Open the CRM login page.
2. Enter your **email** and **password**.
3. Click **Sign in**.

If your account is **deactivated**, you cannot sign in. Contact a super admin.

Sign up (new accounts)

1. Go to **Sign up**.
2. Enter full name, email, and password (minimum 8 characters).
3. Submit—you are taken to your **Dashboard**.

New accounts are created as **Standard Users**.

Sign out

Use **Sign Out** in the dashboard header.

Your home screen

After login you land on **Dashboard** (/dashboard)—your personal workspace for assigned clients.

3. Your roles explained

Account role

You are a **Standard User**. You cannot access the Admin Dashboard, Lead Command Center, or user management.

Client-level assignment roles

Role	Max per client	Typical responsibilities
Relationship Officer	1	Contact, qualify, edit client details, early pipeline stages, create/view deals
Follow-up Officer (Account Service)	1	Service delivery, active-client stage, create/view deals
Doctor (legacy)	—	No longer assigned at client level. Doctors are added on each deal instead.

You may hold different client-level roles on different clients.

Deal-level participation

On each deal, commission is split across **participants** (Relationship, Follow-up, Doctor, PPA, External partner). If you appear on a deal's participant list, your commission for that deal is based on your **participant row**—not only your client assignment.

See **My Deal Participation** on your dashboard for every deal where you earn commission.

What you can do—quick reference

Action	Relationship	Follow-up	Doctor (on deal)
Edit client details	✓	✗	✗
Log calls, emails, meetings, notes	✓	✓	✓ *
Strategy & tasks	✗	✗	✓ *
View deals	✓	✓	✓
Create / edit deals	✓	✓	✓ (deals you can manage)
Advance pipeline (see §6)	Early stages	Active client	Strategy session*
Upload documents	✓	✓	✓ *
Add lead from dashboard	✓	✓	✓

*Requires client assignment **or** deal-level doctor participation where applicable.

4. Dashboard

Route: /dashboard

Header

Button	Purpose
+ Add Lead	Create a new lead manually (you become Relationship owner)
Returnable Statements	Shown if you have doctor returnable obligations on Won deals
Account Settings	Edit display name; set display density (Comfortable / Compact)
Sign Out	End session

Widgets

Dashboard sections use a **cleaner, compact layout**—collapsible **My Work** and **Performance** panels, tighter spacing on client/task lists, and truncated text where needed. Widget density follows your **display density** preference (see §10).

Widget	What it shows
My Assigned Clients	Clients where you are Relationship or Follow-up officer (client-level ownership). Click to open Client 360.
My Deal Participation	Deals where you are a commission participant (doctor, relationship, follow-up, etc.)—your % and amount per deal
My Secured Commission	Your total earned commission on Won deals (from your participant rows)
My Commission Returnable	Current month unpaid returnable total (doctors with returnable obligations only)
My Tasks	Open tasks; check box to mark complete
Recent Activity	Notes, calls, emails, meetings, system events on your clients

My Assigned Clients (relationship / follow-up ownership)

This widget lists clients where you own the **client-level** relationship or follow-up role.

Column	Meaning
Client	Link to Client 360
Client role	Relationship Officer or Follow-up Officer
Status	Pipeline stage
Deal value	Aggregated deal value on the client

Doctors: you are **not** listed here for doctor work alone. Doctor involvement appears under **My Deal Participation**. If you still have an old client-level doctor assignment, it may appear in a collapsed **Legacy doctor client assignments** section—use **My Deal Participation** for current doctor deals.

My Deal Participation

This widget lists every deal where **you** appear on the participant list—most often as a **Doctor**, but also if you are relationship or follow-up on that specific deal.

Column	Meaning
Deal / Client	Links to Client 360
Type	Marketing, Investment, Medical, or Custom
Status	Proposed, Won, Lost, On Hold
My roles	Your participant role(s) on this deal
My %	Your commission percent on this deal
My commission	Dollar amount (Won deals count toward secured commission)

Use this widget to see where you earn on each deal, separate from client-level ownership.

Activity feed tips

- Expand a client group to see recent items.
- Expanding marks items as read.
- Click an entry to open that client's **Activity & Notes** tab.

Adding a lead manually

1. Click **+ Add Lead**.
2. Enter **name** (required) and optional company, email, phone, etc.
3. Submit.

The client is created as **New Lead** and you are auto-assigned as **Relationship** owner.

5. Command palette (quick search)

Shortcut: ⌘K (Mac) or Ctrl+K (Windows)

Available on Dashboard, Client 360, and My Statements.

Key	Action
⌘K / Ctrl+K	Open or close search
↑ / ↓	Move between results
Enter	Open selected client
Esc	Close

1. Open the palette.

2. Type at least one character (name, company, email, or phone).
3. Select a client to open **Client 360**.

Note: Standard users only see **assigned clients** in search results (up to 10).

6. Pipeline stages

Stage	Meaning
New Lead	Just entered the system
Contacted	Initial outreach done
Nurturing	Ongoing qualification
Strategy Session	Strategy work in progress
Active Client	Active engagement
Archived	Closed out

Who can advance one stage

Your role	Can advance when client is in
Relationship	New Lead, Contacted, Nurturing
Doctor	Strategy Session
Account Service	Active Client

1. Open Client 360.
2. Click **Move to Next Stage** (when your role allows).
3. Review the checklist reminders in the confirmation modal.
4. Confirm.

You **cannot** skip stages or set arbitrary stages—that requires a super admin.

Every stage change is logged on the client activity timeline.

7. Client 360

Route: `/clients/[id]`

Layout

- **Left:** Workspace tabs (Strategy & Tasks, Activity & Notes)
- **Right:** Summary widgets (details, deals, team, hierarchy, source records)—compact cards with collapsible sections for extended details and source history

Workspace tabs

Strategy & Tasks (*Doctor or super admin only—you need Doctor role*)

- Edit strategy text.
- Create, edit, complete, and delete tasks (title, description, due date, assignee).

Strategy Planner — Timeline Economics & Projection Journey (*when you have Strategy Planner access*)

Use **Strategy Planner** on Client 360 to build illustrative plans: what the client invests, what income is expected, what expenses or premiums apply, and selected projection checkpoints.

Board / List — strategy items

When editing a strategy item (investment item), you can enter:

- **Invest** amount
- **Timeline** start and end year
- **Income** amount and frequency (monthly, yearly, one-time, or custom)
- Income start and end year
- **Capital back** amount and capital return year

Cards show compact totals such as total income, capital back, and **illustrative** position when those figures can be calculated from what you entered. Missing values show as a dash (—).

Board / List — expenses

Expenses can include amount, frequency, start year, and end year. Cards show total expense over the timeline when computable, plus which strategy item covers the expense when linked.

Projection Journey

Projection Journey is designed for manually selected milestone years and scenarios. It does not generate a full year-by-year projection. Use it to present important points in the client's investment journey, such as the initial investment, income checkpoints, exit scenarios, and total asset position.

Open a plan → **Projection** to add or edit milestones. For each milestone you can:

1. Choose year, title, and type.
2. Select which **strategy items** contribute.

3. Select which **expenses** contribute.
4. Review suggested values (income/expenses/net for that year, cumulatives, capital returned, illustrative total position).
5. Click **Use suggested values** if you want to apply those suggestions — they are **not** applied automatically while you type.

Helper calculations use simple planning rules (for example monthly × 12, yearly as-is, one-time in the start year, inclusive year ranges). They do **not** include growth, compounding, IRR, ROI, yield, or guaranteed returns. Saved figures remain under your control.

Values are illustrative and based on advisor-entered assumptions. Actual results may vary. This view is for planning and presentation purposes only.

Client Strategy Overview (*when you have Strategy Planner access*)

A **read-only** presentation page for clients — separate from Board, List, and Projection management.

- Open a plan → **View client overview** (beside the Board / List / Projection toggle).
- Route: `/clients/[id]/strategy-plans/[planId]/overview`.
- Shows a strategy snapshot, summary cards (investment, income, expenses, capital back, illustrative total position), a **Client Strategy Map** (goal → milestones → outcome) with yearly cashflow figures and contributing item chips, plan perks, disclaimer, and suggested next steps.
- Milestones and figures are **manually entered** by the advisor (or applied from suggestions when editing); the report does not auto-generate every year.
- Use **Print** in the browser for a hard copy; use **← Back to Strategy Planner** to return to the workspace tab.

Values are illustrative and based on advisor-entered assumptions. Actual results may vary. This view is for planning and presentation purposes only.

Activity & Notes (*all assignees*)

- View manual interactions and system events.
- Filter: All, Notes, Emails, Calls, Meetings, System.
- Add call, email, meeting, or note.
- Edit or delete **your own** manual entries.

Right-column widgets

Widget	What you can do
Client details	View all fields; Edit if you are Relationship assignee
Deal info	Participant list per deal (who earns what %); your share highlighted; edit if you can create/manage that deal
Assigned team	View Relationship and Follow-up officers; legacy doctors collapsed (view only—super admin manages assignments)
Company hierarchy	View colleagues; Add employee lead at same company
Lead source records	View ingestion history (read-only)

Documents

- **Upload:** Any assignee.
- **Delete:** Super admin only.

Adding an employee lead

From **Company hierarchy**, add a colleague at the same company. A new **New Lead** is created and you become Relationship owner.

8. Deals and tasks

Deals (Client 360 → Deal Info)

Each deal shows:

- Deal name, value, total commission, type, and status
- **Participant list** — who earns from the deal (Relationship, Follow-up, Doctor, PPA, External partner) with % and amounts
- **Your share** — if you are on the participant list, your commission for that deal is shown

If you can create or manage the deal, use **Add Deal / Edit** to:

- Select **deal type** and **apply a commission template**
- Add participant rows (relationship, follow-up, doctors, PPA, external partner)
- Split the doctor pool across multiple doctors

- Set doctor **returnable** fields before marking **Won**

Won deals require participant percentages to total **100%**. Won deals count toward **My Secured Commission** and may generate returnables for doctors with **Returnable required**.

Who can edit depends on your deal access (relationship/follow-up assignee, deal-level doctor participant, or super admin).

Tasks (*Doctor client assignee or as configured*)

- Manage on **Strategy & Tasks** tab.
- Statuses: Pending, In Progress, Completed, Cancelled.
- Complete from Client 360 or **My Tasks** on your dashboard.

9. Commission and returnables

How commission is calculated (deal participants)

Commission is based on **deal participant rows**, not only your client assignment.

For each **Won** deal where you appear as a participant:

`your commission = deal total commission × your participant %`

My Secured Commission on the dashboard sums **your** participant amounts across all Won deals (relationship, follow-up, doctor, or any role where you have a participant row).

Example on a \$10,000 commission Investment deal:

If you are...	Typical %	Your amount
Relationship participant	10%	\$1,000
Follow-up participant	10%	\$1,000
Doctor participant (one of two)	30%	\$3,000

Deals without participant rows may still use older client-assignment formulas until backfilled by an admin.

Legacy pool reference (older deals only)

Pool	Share
Doctor	60%
Relationship	10%
Account Service	10%
Company overhead	20%

Secured commission (dashboard)

My Secured Commission = total of your participant earnings on **Won** deals. Check **My Deal Participation** for the per-deal breakdown.

My Statements (/my-statements)

For users with **doctor returnable** obligations on Won deals.

- Commission **returnables** grouped by month.
- Columns: client, deal, amount, status (Unpaid / Paid).
- Check **Mark as Paid** when settled.

Returnables are generated from **doctor participant** rows when a deal is marked **Won** and **Returnable required** is set on that doctor row.

10. Account settings

Route: /dashboard/settings

- Edit **display name**.
 - **Display density** — choose **Comfortable** or **Compact** for dashboard widgets and Client 360 side panels. Saved in your browser; default is **Comfortable** for standard users.
 - **Email** is read-only—contact an admin to change.
 - Password is managed at login/signup (no in-app password change).
-

11. Daily workflow (recommended)

1. Open **Dashboard** → review **My Assigned Clients**, **My Deal Participation**, tasks, and activity.
 2. Press **⌘K** to jump to a client.
 3. Log calls and notes on **Activity & Notes**.
 4. Advance pipeline when your role allows.
 5. On Client 360 **Deal Info**, confirm participant lists on active deals.
 6. Doctors: check **My Statements** for unpaid returnables.
-

12. Troubleshooting

Problem	What to try
Cannot sign in	Check credentials; confirm account is not deactivated
Cannot edit client details	Confirm you are Relationship assignee on that client
Cannot create deals	Confirm you are relationship/follow-up assignee or deal-level doctor with manage access
Secured commission seems low	Check My Deal Participation —only Won deals and your participant % count
Not listed under My Assigned Clients	Expected for doctors assigned only on deals; see My Deal Participation
Cannot advance pipeline	Confirm your role matches the current stage (see §6)
Command palette empty	Type at least one character; you only see assigned clients
Returnables look wrong after team change	Wait a few seconds and refresh

13. Keyboard shortcuts

Shortcut	Action
⌘K / Ctrl+K	Open command palette
Esc	Close palette / modals
↑↓ + Enter	Navigate palette results

Profit Pulse Ally CRM · Standard User Manual · For super-admin features see the Super Admin Manual.
